December 20, 1968

VICE PRESIDENT
DIRECTOR OF RESEARCH

Dear Dave:

As you know, a considerable amount of interest has been around with the  regarding possible uses of techniques developed by your group and mine during the recent years. Originally I thought that support would probably be made available through ARPA and this may still be the case; however, at the present time your organization appears to be carrying the ball.

25X1

In order to lose as little time as possible, we initiated experiments some three weeks ago which proved feasibility in a preliminary way. To do this we used equipment purchased under prior contracts and did not in any way interfere with the present work going on under a current contract with another group. The experiments have now reached the point where cooperation with the other group presently using the equipment would be very desirable since a lot could be learned more rapidly if their equipment were now made available at a mutually agreeable time. Specifically, we would like the use of this equipment for a two day period during the week of January 6 and a one week period starting January 20th. The former would permit final laboratory experiments while the latter would provide data from the field.

25X1

We anticipate that the total costs to date and including the two additional days in the laboratory will total approximately \$  while the expenses incurred during the week of January 20th should approximate  In the latter we have included  for rental of a Kay "Sonograph".

25X1A1A

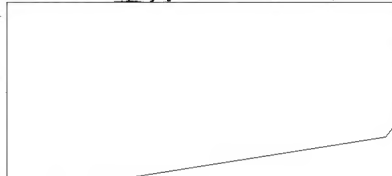

25X1

We would expect these costs could be covered by 

25X1

I trust this meets with your approval.

Sincerely,

25X1
